

Utility Infrastructure Report

Lakeside Retreat Land

Austin, Texas | Travis County

Purpose

This report summarizes the currently available utility infrastructure for the property and identifies items that should be verified before land acquisition or development.

Property Summary

Attribute	Value
Property ID	LR-002
Property Type	Residential Land
Lot Size	1.2 Acres
Location	Near Lake Travis, Austin, TX
Current Use	Vacant Residential Land

Utility Availability

Utility	Current Status	Comments
Road Access	Available	Existing road provides access to parcel
Water Service	Available	Verify service connection with provider
Electricity	Limited	Extension may be required before construction
Natural Gas	Unknown	Confirm with local utility company
Internet	Available in surrounding area	Service availability should be confirmed
Sewer	Not Confirmed	Septic system may be required

Infrastructure Observations

- Road access appears suitable for residential development.
- Water availability is an advantage for future construction.
- Electricity availability should be confirmed before closing.
- Utility extension costs should be obtained from the provider.
- Telecommunication services should be verified with local ISPs.

Recommended Due Diligence

- Request utility availability letters.
- Obtain electricity extension estimates.
- Confirm septic permit requirements.
- Verify utility easements.
- Review county infrastructure plans.

Disclaimer

This report is fictional and prepared for the SmartPlots portfolio project. Utility availability should always be confirmed directly with the appropriate service providers before purchase or development.
