| Zoning      | mixed-use   | Listing | sale / available |
| Road access | Available   | Water   | Available        |
| Electricity | Available   | Sewer   | Available        |

## Preliminary Site Conditions

This 0.24-acre parcel should receive normal soil, drainage, and buildability review before design work.

SmartPlots flags soil diligence as especially important where septic, slope, floodplain, or retaining wall issues may affect cost.

## Recommended Studies

Order a geotechnical review for bearing capacity, drainage behavior, and foundation recommendations.

Confirm septic feasibility where public sewer is not available.

Flood elevation, sea-level resilience, and entitlement timing may materially affect project cost.

## SmartPlots Demo Note

This document is generated from SmartPlots demo data for product demonstration, RAG ingestion, and land-discovery workflow testing.
